Precipitation probability					
50%	70%	50%	60%	40%	40%

Forecast for Saturday 31 Oct 2020

Weather: Rain will start before daylight and will soon turn heavy and persistent for much of the day. South easterly winds will strengthen throughout the morning with storm force gusts on the munro tops. Combined with the driving rain it will make for very difficult progress on the hills with very poor visibility at times. Rain turning wintry on munro tops later in the day.

Chance of cloud free mountain/hill tops above 800m: 70% around dawn but cloud soon becoming thicker at lower levels and there will be very little clearance at all above 600m. 20% by the afternoon.

Visibility: Good at dawn but soon turning poor or very poor at times.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Winds are likely to gust even stronger than the forecast values and gusts may reach 90mph particularly on the Cuillin ridge. A severe wind chill is expected in the morning and evening and becoming quite wintry on Saturday night.

Forecast for Sunday 01 Nov 2020

Weather: Another wet and windy day expected with snow expected on the munro tops and storm force gusts likely. Some breaks in the cloud are likely after lunchtime however showers will soon follow and further more persistent rain or snow is likely in the evening.

Maximum wind: Southwesterly 40-50mph with gusts 70-80mph, stronger on exposed ridges.

Chance of cloud free mountain/hill tops above 800m: 20% during the morning, with very few cloud breaks likely, becoming 60% for a time in the afternoon when there may be some brightness.

Visibility: Poor or very poor but may improve good for a few hours in the afternoon.

Temperature: **Glens:** Plus 7 Celsius rising to 14 Celsius.
At 800m: Plus 2 Celsius.
Freezing level: Around 900m.
